

ELSMOAL S. IBRAHIM

Chief Technology Officer (CTO) | Independent Backend & SaaS Architect

 contact@elsmoal.com  Al Ain, Abu Dhabi, UAE  linkedin.com/in/elsmoal-  github.com/Elsmoal

• Official Software Development Freelance License · Abu Dhabi, UAE

PROFESSIONAL SUMMARY

Independent Full-Stack Software Engineer and Backend Architect holding an official Software Development Freelance License in Abu Dhabi. Specializing in building highly scalable, multi-tenant SaaS platforms, high-concurrency microservices, and secure cryptography systems (AES/ECC). Proven track record in orchestrating zero-downtime deployments, engineering robust monetization layers, and designing Zero-Trust backend architectures for enterprise-grade applications and AI integrations.

CORE COMPETENCIES

BACKEND & DATABASES

Node.js NestJS Next.js Python
PostgreSQL Redis Qdrant Appwrite

ARCHITECTURE & SECURITY

Microservices Multi-tenant SaaS Zero-Trust
AES/ECC RBAC JWT

DEVOPS & INFRASTRUCTURE

Linux (Debian/Kali) Docker Cloudflare Vercel
SSH Dev-Envs n8n

INTEGRATIONS

Tap Payments Ziina WhatsApp API
Instagram API Socket.io AI Agents

PROFESSIONAL EXPERIENCE

Chief Technology Officer (CTO)

2024 – Present

Mulham AI

Remote

- Architect the complete B2B SaaS infrastructure, establishing isolated deployment environments and securing internal workflows via Zero-Trust network access.
- Design and implement API-driven AI integration patterns utilizing self-hosted vector databases (Qdrant) and Appwrite for scalable, cost-effective data state management.
- Configure and manage enterprise IT infrastructure and communications, optimizing operational costs by routing secure workspace emails via Cloudflare and Zoho Workspace.

Independent Software Engineer & Backend Architect

2024 – Present

Freelance (Official Abu Dhabi License)

UAE

- Engineer comprehensive B2B SaaS platforms from initial infrastructure setup to deploying secure, scalable microservices and decoupled monolithic structures.
- Develop custom n8n self-hosted workflows to automate omnichannel business processes, significantly reducing manual operational overhead for clients.
- Design secure database schemas (PostgreSQL) and implement robust authentication alongside automated financial transaction protocols utilizing regional payment gateways (Tap Payments, Ziina).

CipherVault

Engineered a hybrid security system combining AES + ECC cryptography with steganography for multilayer data protection.

TypeScript

Python

Cryptography

Mithaq

Built a multi-tenant B2B SaaS platform with a decoupled microfrontend architecture connecting TypeScript/React frontend to Python/Docker backend.

TypeScript

React

Python

Docker

Tanseeq

Developed a TypeScript-first application utilizing modern npm workflows and clean architectural patterns for highly maintainable codebases.

TypeScript

npm

LinkedPro

Created a robust Python-based automation tool to streamline repetitive professional workflows and optimize web automation tasks.
